

S-Blend Sort

This sort contains words with sl, sn, sm, st, sp, or sw blends. Each set has a picture of the key word for that blend sound and four words. The s-blend words in the pictures do not all have short vowel sounds, but all the words do. There are two words (smash and swish) that contain the digraph sh. I also stayed away from words in the sw family with a short a that is impacted by following the w (for example, swat and swap).
